Requerimiento Funcional	Nombre de la Clase	Nombre del método
1- Registry book	Main	registryBibliographicProduct()
	Controller	registerBook()
	Book	Book(…)
	BibliographicProduct	BibliographicProduct(…)
1- Registry Magazine	Main	registryBibliographicProduct()
	Controller	registerMagazine()
	Magazine	Magazine(…)
	BibliographicProduct	BibliographicProduct(…)
2 – Modify Bibliographic product	Main	modifyBibliographicProduct()
	Controller	modifyProductName()
	BibliographicProduct	setName()
	Controller	modifyProductDate()
	BibliographicProduct	setPublishDate()
	Controller	modifyProductPages()
	BibliographicProduct	setPages()
	Controller	modifyBookReview()
	Book	setReview()
	Controller	modifyBookPrice()
	Book	setSalePrice()
	Controller	modifyBookGenre()
	Book	setGenre()
	Controller	modifyMagazineEmission()
	Magazine	setFrequency()
	Controller	modifyMagazineSubPrice()

Requerimiento Funcional	Nombre de la Clase	Nombre del método

	Magazine	setSubPrice()
	Controller	modifyMagazineCategory()
	Magazine	setCategory()
3 – Delete bibliographic product	Main	deleteBibliographicProduct()
	Controller	deleteBibliographicProduct()
4 – Registry User	Main	registryUser()
	Controller	registryUser()
	Premium User	Premium User()
	Regular User	Regular User()
	Users	Users()
5 – Buy a bibliographic product	Main	buyBibliographicProduct()
	Controller	buyBibliographicProduct()
	Premium User	addProduct()
	Regular User	addBook()
	Regular User	addMagazine()
6 – Simulate lecture session	Main	simulateLecture()
	Controller	sendNameForSimulation()
	Controller	sendTotalPagesForSimulation()
7 – Initialize system	Main	initSystem()
	Controller	initSystem()
